

SOCIB: OCEAN SCIENTISTS

Oceanographers are people who work to find out about and conserve the oceans. They are helped by instruments and robots which collect information from the sea. This is very useful for going sailing, finding out if we can go swimming when on the beach, and even to forecast if it's going to rain or be really hot!

Have a look at the drawing:
Identify the instruments the
oceanographers use.

NAME AGE

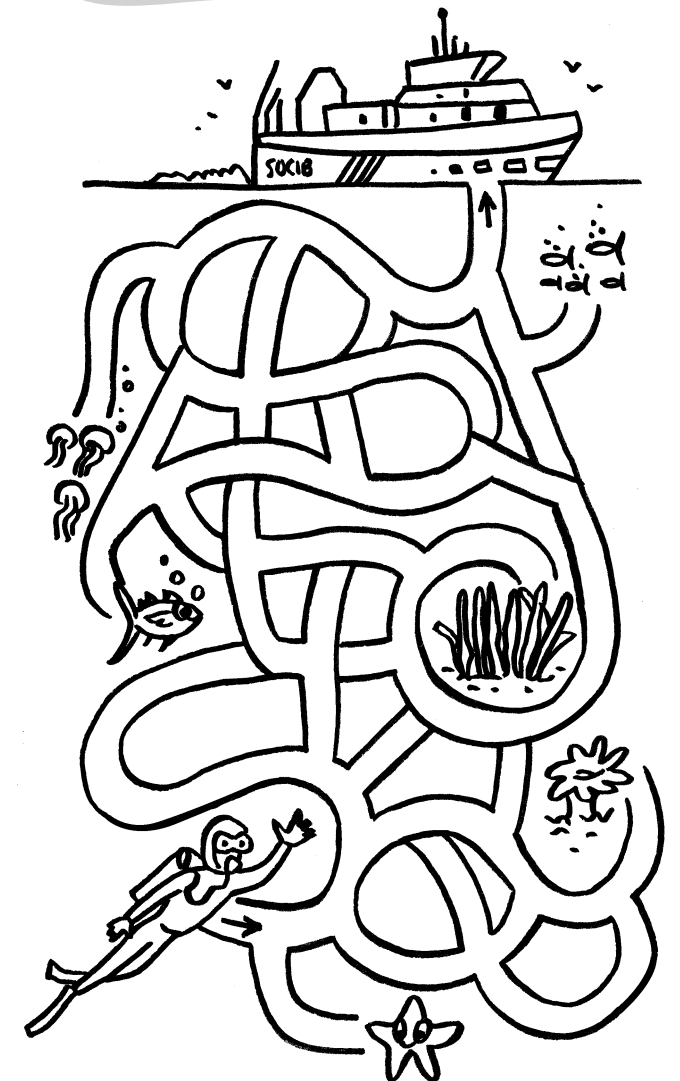

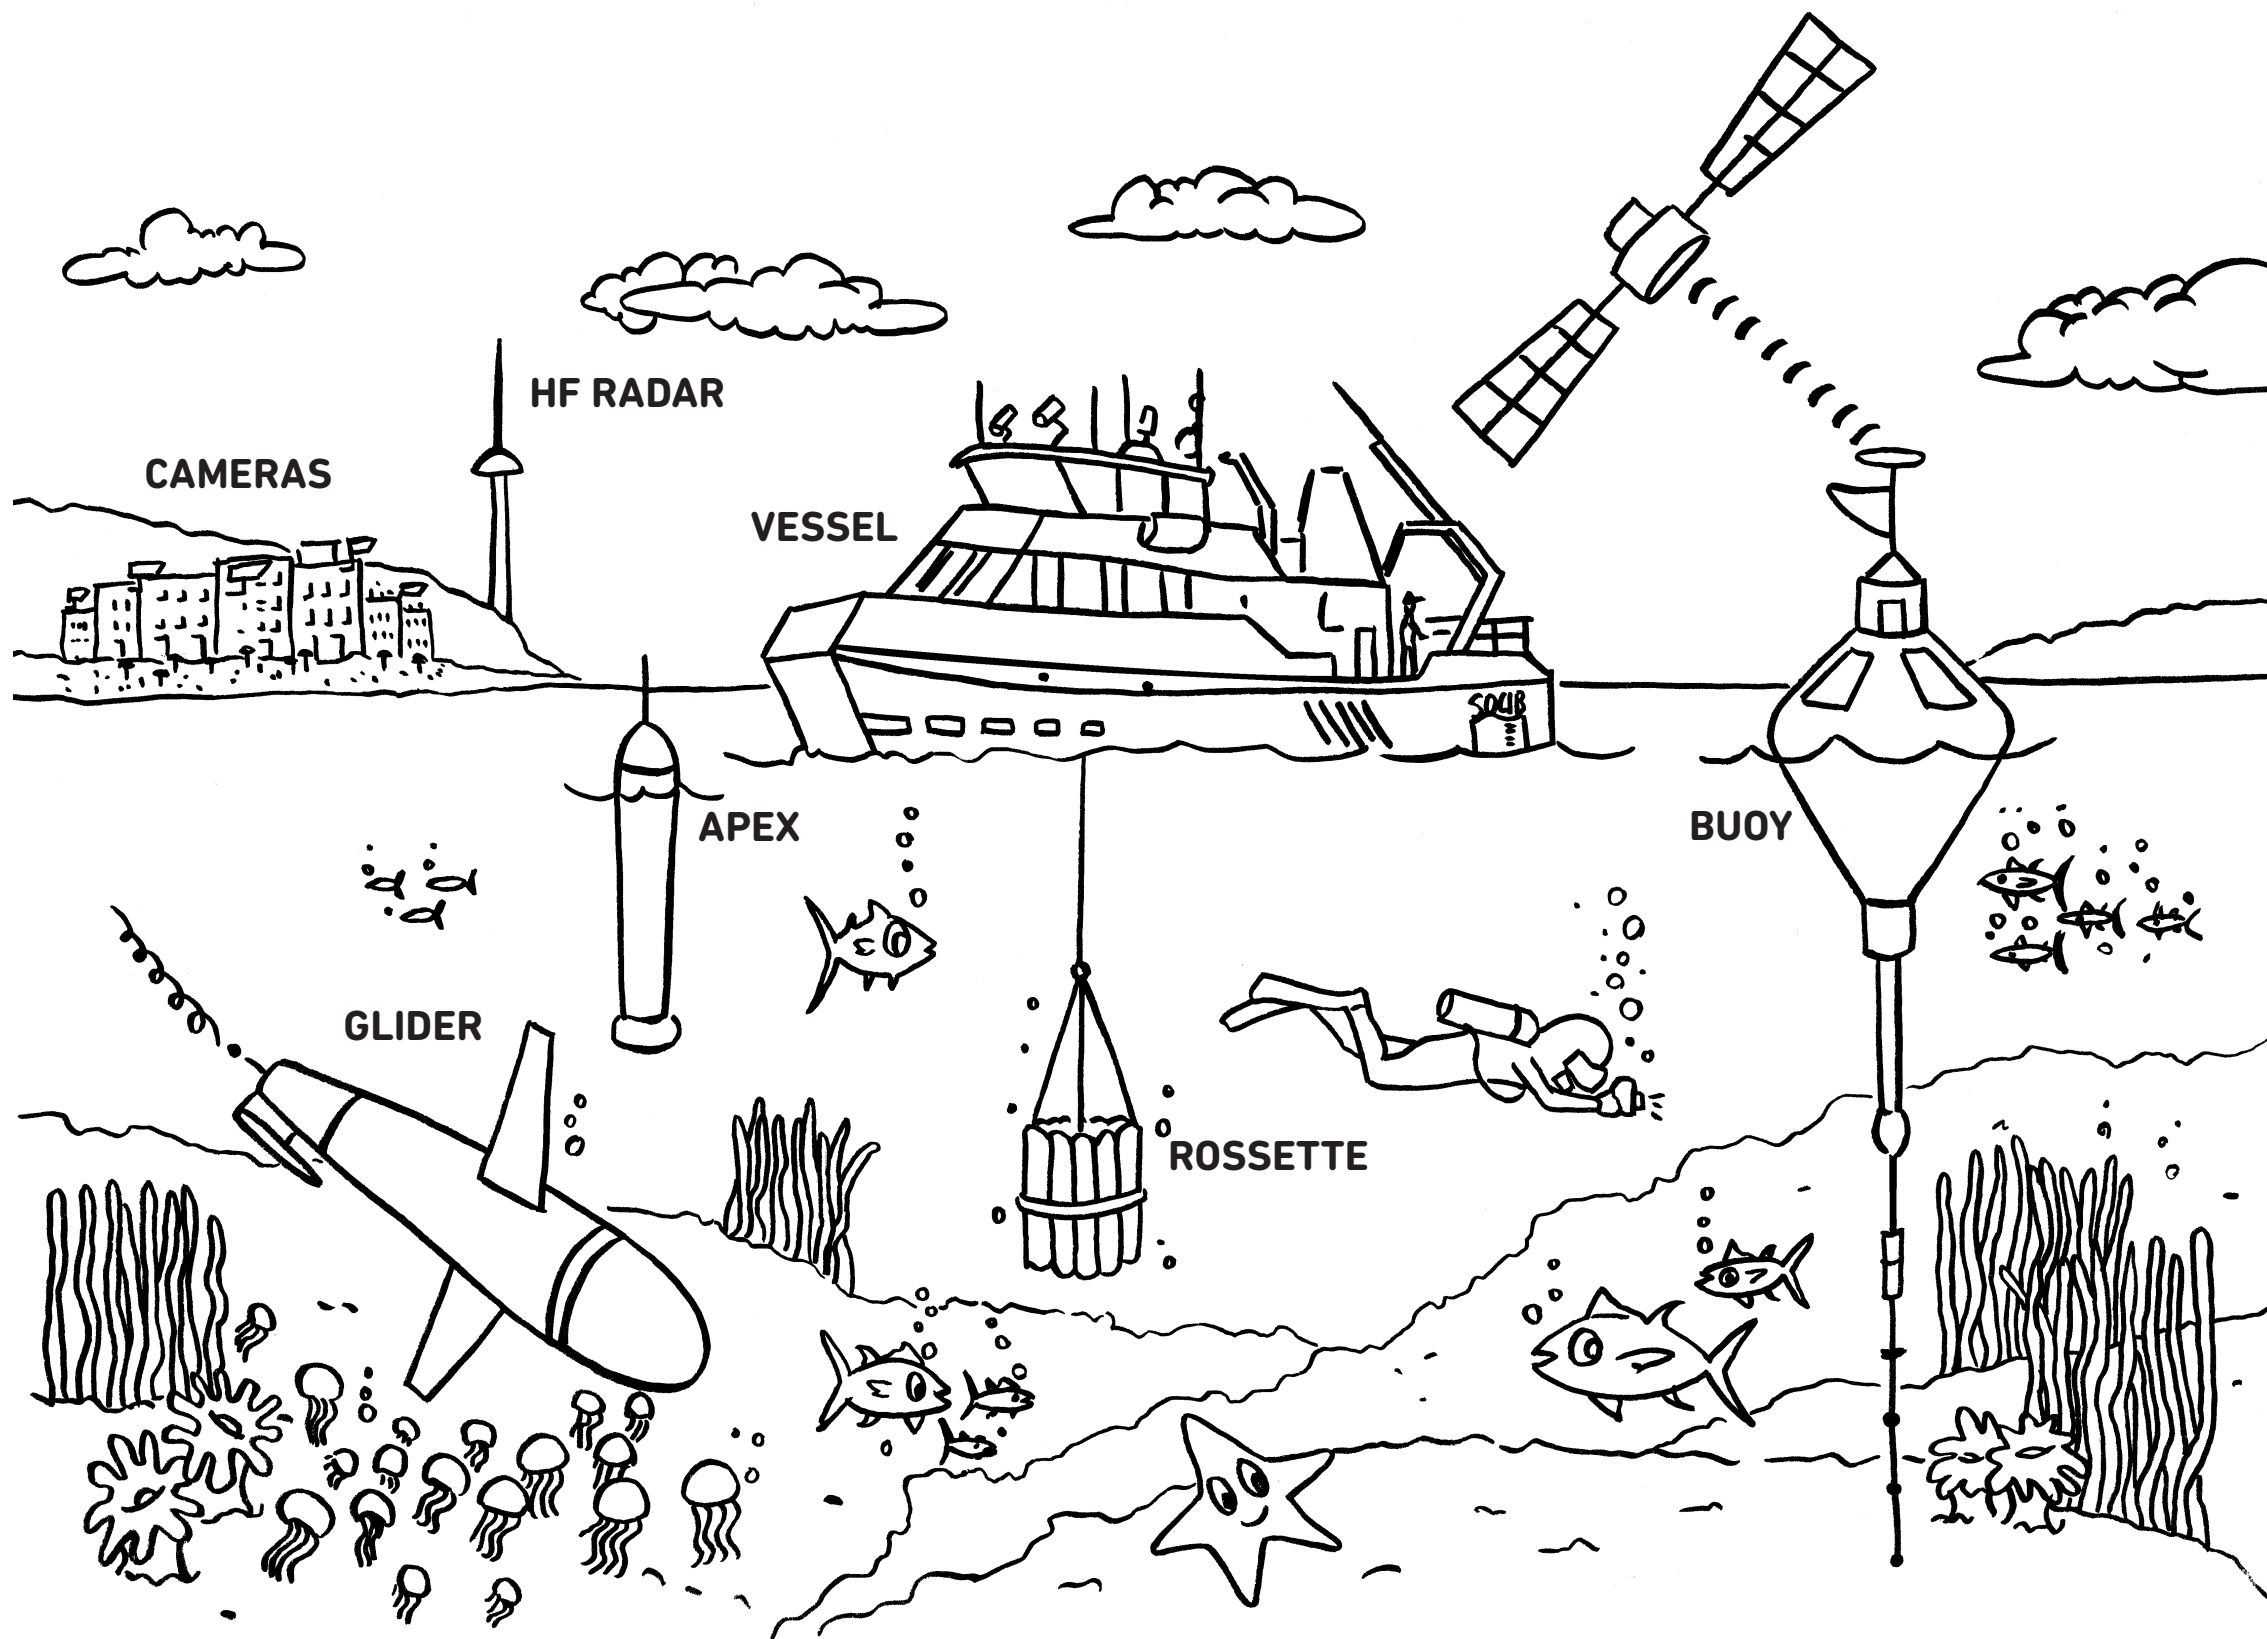

How do my family and I
help preserve the ocean?

.....

.....

.....

Find the route the diver
must follow to get to the
oceanographic vessel.

DID YOU KNOW?... SOCIB
has underwater robots,
buoys, a radar and even an
oceanographic vessel.
